Career Aspirations

IT Administration and Security

Cybersecurity

Prompt Engineering

Backend Programming

AI and Machine Learning

Database Development and maintenance

Hobbies

Exploring philosophical writings
Studying philosophy enhanced critical thinking, broadened perspective on human experience.

Bicycle Riding and skateboarding
Engage in these sports to maintain a healthy school work-life balance

Cleaning and organizing
Cherish living and working in a clean, neat and organized environment.

DIY creations
My own creations include a monitor stand that serves as my workstation/studio, demonstrating an innovative mind

Reading
Interested in general reading to expand knowledge of my surroundings and to keep up with latest tech trends

Basketball
Engaging in basketball gives me great joy as it fosters a sense of teamwork and discipline.

Swimming
Regular swimming sessions provide me with relaxation and enhance my physical well-being.

Html, Css, Javascript, JQuery, Nicepage

Technical Skills possessed

- Development of ERP System Using Microsoft Business central.
- Skilled in REST APIs, testing with Postman.
- Experienced with Docker and containerization tools.
- IT Technical assistance and problem-solving.
- Hardware/Software setup and Maintenance.
- IT documentation development and project support.
- IT technology trend analysis and recommendation.
- Operating systems Installation and Deployment.
- Network and server system management assistance.
- Proficient in Linux/Windows Operating systems.
- Working Knowledge of Web Development tools and IDE's (Integrated desktop environments) ; visual studio code, Pulsar, vim, Git, GitHub.
- Working Knowledge of Google workspace, Microsoft 365, Adobe creative suite and Libre suite.
- Fast typing skills - 40 words per minute.
- Ability to learn quickly.

Source of Technical Skills

- 1. Academic Projects**
- Theta Hotel Management System (<https://github.com/kibexd/Hotel-Management-System-Visual-Basic->).
 - Check-inn Hotel Management System (<https://github.com/kibexd/Checkinn-Hms->)
 - Two undergraduate course projects completed and submitted for marking.

- 2. Professional Client Work**
- Umithio Consultancy Website (<https://umithio.netlify.app/>).
 - Ivy's Website (<https://ivvy.netlify.app/>).
 - Decentralized Voting System (Work in Progress) .(<https://decentralizedvotingsystem.netlify.app/>).
 - Personal Portfolio Website (<https://kiffee.netlify.app/>).

- 3. Technical Support & Troubleshooting**
- Provided technical assistance to schoolmates, parents, and friends.
 - Troubleshooting, diagnosing and fixing laptop/computer issues.
 - Debloating Windows installations.
 - Data recovery (retrieving deleted files from drives).
 - Operating System setup and updates.

Soft Skills

- Leadership**
- Led a class group, fostering a sense of inspiration among team members and encouraging them to work together to attain collective success.
- Teamwork**
- Developed open communication, handled disagreements when they arose, and worked well with others on a variety of team projects.
 - Oversaw a group project in class, motivating the five members of the team and organizing tasks to finish deliverables on schedule.
- Communication**
- Explained complicated topics to non-technical audiences during class meetings for software requirements projects
 - Wrote clear documentation and training guides for new tools/processes learned in classes
- Time Management**
- Balanced coursework across a full load of 6 classes per semester over 8 semesters, demonstrating strong prioritization and deadline management.
 - Utilized productivity apps and techniques to optimize task completion and goal achievement.
- Collaboration**
- Worked cooperatively with classmates to reinforce coding and other technical concepts while actively participating in study groups.
 - Collaborated on paired programming assignments, sharing knowledge, and providing feedback in a collaborative environment.
- Planning**
- Arranged and planned study sessions, meetings, and group tasks.
 - Developed project plans, timelines, and work breakdown structures for all major assignments, ensuring thorough research and effective execution.
- Problem Solving**
- Skilled in problem-solving through code debugging, test case analysis, and logical reasoning.
 - Took a methodical approach to solving complex challenge problems in technical assessments.

Addition skills

- Driving Experience**
- 2 years, 6 months plus of safe driving.
 - Possess a valid driving license.
