Html, Css, Javascript, JQuery, Nicepage

Technical Skills possessed

- IT Technical assistance and problem-solving
- Hardware/Software setup and Maintenance
- IT documentation development and project support
- IT technology trend analysis and recommendation
- Operating systems Installation and Deployment
- Network and server system management assistance
- Proficient in Linux/Windows Operating systems
- Working Knowledge of Web Development tools and IDE's (Integrated desktop environments) ; visual studio code, Pulsar, vim, Git, GitHub
- Working Knowledge of Google workspace, Microsoft 365, Adobe creative suite and Libre suite

Source of Technical Skills

1. Academic Projects

- Theta Hotel Management System (<https://github.com/kibexd/Hotel-Management-System-Visual-Basic->)
- Check-inn Hotel Management System (<https://github.com/kibexd/Checkinn-Hms->)
 - Two undergraduate course projects completed and submitted for marking

2. Professional Client Work

- Umithio Consultancy Website (<https://umithio.netlify.app/>)
- Ivy's Website (<https://ivyy.netlify.app/>)
- Decentralized Voting System (Work in Progress) (<https://decentralizedvotingsystem.netlify.app/>)
- Personal Portfolio Website (<https://kiffee.netlify.app/>)

3. Technical Support & Troubleshooting

- Provided technical assistance to schoolmates, parents, and friends
- Troubleshooting, diagnosing and fixing laptop/computer issues
- Debloating Windows installations
- Data recovery (retrieving deleted files from drives)
- Operating System setup and updates

Soft Skills

Leadership

- Currently leading a class group with primary responsibility being fostering a sense of inspiration among team members, encouraging them to work in order to attain our collective success.

Teamwork

- Collaborated effectively on multiple team assignments, fostering open communication and managing conflicts when they arose.
- Led a group project in class, keeping the 5-member team motivated and coordinating workflows to complete deliverables on time.

Communication

- Presented complex technical topics to non-technical audiences during class meetings for software requirements projects.
- Wrote clear documentation and training guides for new tools/processes learned in classes.

Time Management

- Balanced coursework across a full load of 6 classes while also working a part-time job, demonstrating strong prioritization and deadline management.
- Utilized productivity apps and techniques to set goals, create schedules and systematically complete tasks.

Collaboration

- Actively participated in study groups, working collectively with classmates to reinforce coding and other technical concepts.
- Paired programming assignments allowed sharing knowledge and feedback in a collaborative environment.

Planning

- Created detailed project plans, timelines and work breakdown structures for major assignments.
- Organized and scheduled meetings, study sessions and group workflows.

Problem Solving

- Skilled at troubleshooting issues through debugging code, analyzing test case failures and applying logic.
- Took a methodical approach to solving complex challenge problems in technical assessments.

Addition skills

Driving Experience

- 2 years, 6 months plus of safe driving.
- Possess a valid driving license.
